

Jung Type Indicator (JTI)

The Jung Type Indicator is a reliable, non-ipsative personality measure based on Jung's typology. With only sixty items, it is very quick to complete and extremely economical to use. It is based on a familiar, well established theoretical framework. Many users can benefit from their prior experience with Jungian typology-based measures.

Primary scales

Extraversion / Introversion ·
Sensing / Intuiting ·
Thinking / Feeling ·
Judging / Perceiving
